

SOFTWARE

Software On Demand

| Application | Software On Demand |
|-------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Description | <p>The Software On Demand service allows students to use additional software on desktop PC's where the service has been installed. The applications are streamed over the University network 'On Demand' when requested by the user. The applications are not installed on the local PC, the use of the 'Software On Demand' software is transparent to the user, therefore requiring no user intervention.</p> <p>On PCs with the service installed, Software On Demand applications are available via the 'SoftwareOnDemand' folder in the start menu.</p> |
| Prerequisites | <p>Software: Software On Demand installed onto PC.</p> <p>Hardware: PC running Windows OS.</p> |
| How to request | <p><u>UOSW - Treforest, Glyntaf and ATRium</u></p> <p>Windows PCs: Software On Demand should already be installed on all open access laboratory PCs running Windows, along with all teaching laboratories running Windows.</p> <p>NOTE: The software available via the service in open access laboratories will differ to those in teaching laboratories.</p> <p>Apple Macintosh computers and other devices: Not available at present.</p> <p><u>UOSW - Newport</u></p> <p>Not available at present.</p> |
